1.0 SCOPE

This specification covers the .093 diameter pin and socket terminal product line with their associated connector housings designed for use on copper wire.

2.0 PRODUCT DESCRIPTION

2.1 PRODUCT NAME AND SERIES NUMBER (S)

2.1.1 The standard connector is made in 1, 2, 3, 4, 5, 6, 9, 12, and 15 circuit sizes. Connector plugs and receptacle are nylon and provided with optional mounting ears for snap-in panel mounting. The housing accepts wire ranges 30 thru 14 AWG wires and insulation diameter range of .030 thru .160 inches.

Crimp Terminals

Description	Series Number
Female terminal, 14-20 AWG	1189
Male terminal, 14-20 AWG	1190
Male terminal, 18-22 AWG	1380
Female terminal, 18-22 AWG	1381
Female terminal, 24-28 AWG	1433
Male terminal, 24-28 AWG	1434
Male terminal, grounding pin, 1973, 1973-1, 18-22 AWG	1973
Male terminal, grounding pin, 1973-2, 14-18 AWG	1973
Male terminal, large insulation 14-18 AWG	42138
Male terminal, phos. bronze 14-20 AWG	4549
Female terminal, phos. bronze 14-20 AWG	4550

6.0 PACKAGING

Parts shall be packaged to protect against damage during normal handling, transit and storage. "For specific part packaging details, refer to the packaging specification called out on the applicable product sales drawing.

7.0 CABLE TIE AND/ OR TWIST LOCATION

Circuit Sizes			Dimension T Minimum
2	4	6	0.50" (12.7mm)
8			0.75" (19.1mm)
10	12		1.00" (25.40mm)
14	16		1.25" (31.75mm)

The "T" dimension defines a "free" length of wire, or a length of wire that is not subject to significant bias by external factors such as a wire tie, wire twisting, or other means of bending or deforming of the wires that repositions them from their natural relaxed state or location where they enter the housing. Wires are to be dressed in such a manner to allow the terminals to float freely in the pocket. This dimension is general recommendation and may need to be adjusted for different wire gauges and wire type and insulation thickness and insulation material.
